

OLEKSANDR TARATUNIN

5+ years shipping for the web

React · Astro · Next.js · Node.js · AI

HELLO!

My name is **Oleksandr Taratunin**. I am a **full-stack developer** with a frontend focus, based in Ukraine and working remotely. For 5+ years I have been shipping production web apps in React, Astro and Next.js - owning frontend architecture end to end, turning designs into fast, accessible, maintainable interfaces wired to APIs and CMS. AI tooling is built into my daily workflow.

EXPERIENCE

2023 - present

OneCloudPlanet

Frontend Developer

Cloud platform: console, admin, site & docs. API integrations, E2E coverage, test-run dashboard.

2023 - present

Freelance

Full-Stack Developer

Web apps & service portals across frontend, CMS and API layers.

2021 - 2023

Hard-Soft

Frontend Developer

Responsive apps, design systems and component libraries for enterprise clients.

2020 - 2021

Startup Studio

Junior Developer

MVPs for startups; agile and modern workflows.

LANGUAGE

Ukrainian (native)

English (intermediate)

SELECTED PROJECTS

OneCloudPlanet - Corporate Website

onecloudplanet.com

Corporate website

Corporate site for OneCloudPlanet's business cloud platform- products, pricing and use cases in one place. Localized routes combine Strapi content and API-fed prices with paths to the console and docs.

Astro · Strapi 5 · TypeScript · i18n · SEO

OneCloudPlanet - Customer Console

console.ocplanet.cloud

Cloud management console

Customer console for provisioning and operating cloud infrastructure: compute, managed Kubernetes, networks, load balancers and block/object storage. Client-scoped roles gate actions; billing and support live in the same interface.

React · TypeScript · styled-components · OpenStack

OneCloudPlanet - Documentation

docs.onecloudplanet.com

Documentation platform

Task-oriented documentation portal for OneCloudPlanet cloud services. EN/UK user guides cover control-panel workflows, a separate API reference is generated from OpenAPI, and search runs through Algolia.

Docusaurus 2 · React · MDX · OpenAPI · Docker

FrameProof

github

Figma tooling · pet project

Developer toolkit turning Figma data into implementation context. CLI and MCP server export design tokens, assets and component metadata; a visual gate compares live UI against Figma or PNG references.

TypeScript · Node.js · Model Context Protocol · Playwright · Design tokens

DevScanner

github

Desktop developer tool · pet project

Cross-platform desktop workspace that scans local projects and monorepos, detects stacks and launches npm or Docker workflows with live logs. Manages ports and containers and adds SSH tooling for remote services and deployment.

Electron · React · JavaScript · Node.js · Vite

StatementExport

statementexport.com

Bank statement converter · pet project

SaaS that turns PDF bank statements, including scanned documents, into reviewable transactions and CSV/XLSX files. Users compare extracted rows with the source, correct them before export, and process statements in shared organization workspaces. Built end to end: localized Astro interface, React admin, FastAPI API, PDF/OCR and export pipeline, auth, billing, org workflows, background jobs and deployment.

Astro · React · FastAPI · PostgreSQL · Celery

OneVOIPlanet

onevoiplanet.com

Corporate website

Multilingual corporate site for OneVOIPlanet, a cloud IP-telephony platform: services and tariff plans leading to the customer portal or a connection request. Next.js frontend with Strapi lead forms and analytics.

Next.js · TypeScript · Strapi 4 · PostgreSQL · i18n

OneCloudPlanet - QA Automation

private

QA automation platform · private

Internal QA platform for the customer console: browser E2E tests with guarded manual and scheduled runs. The dashboard streams live progress and keeps run history, logs, screenshots and artifacts.

WebdriverIO · Cucumber · TypeScript · React · Node.js

OneCloudPlanet Admin

private

Cloud operations admin · private

Closed-access staff panel for managing clients, cloud resources and billing. Permission-based workflows across infrastructure operations, service lifecycles, platform settings and reporting.

React · TypeScript · styled-components · Tailwind CSS · Formik

Material Assistance Registry

private

Registry back office · private

Internal cabinet for processing material-assistance applications: applicant records, workflows, protocols, decisions, document handling and reference data in one interface.

Next.js · TypeScript · HeroUI · Tailwind CSS · REST API

Virtual Assistant Platform

rights transferred

AI assistant · private

Embeddable virtual assistant deployed as an isolated instance per project with a shared knowledge base. Text and recorded-voice conversations, RAG-grounded answers and Strapi knowledge management.

React · TypeScript · Strapi 4 · PostgreSQL · Docker

Pool Booking Service

rights transferred

Pool booking service · rights transferred

Online booking for municipal swimming pools: pool, category and capacity-aware time slots with Portmone payments; staff manage schedules through custom Strapi Admin calendar and statistics modules.

Next.js · TypeScript · Strapi 5 · PostgreSQL · Docker

Municipal Investment Platform

rights transferred

Investment platform · private

Municipal platform for exploring investment opportunities: a filterable project catalog, CMS-driven detail pages and interactive maps with registration and contact flows.

Next.js · TypeScript · Strapi 4 · PostgreSQL · Leaflet

Resident Card Service Portal

rights transferred

Resident card platform · private

Self-service portal for resident-card issuance: identity verification through ID.gov.ua, document submission and Portmone payments. Astro SSR frontend with a Strapi backend.

Astro · TypeScript · Strapi 5 · PostgreSQL · Docker

Adult Retail Platform

rights transferred

E-commerce platform · rights transferred

Bilingual 18+ online store: catalog search and filters, favorites, guest or account checkout, WayForPay payments, Nova Poshta delivery and feed-synced catalog.

Next.js · TypeScript · Strapi 4 · PostgreSQL · Docker

Creator Marketing Platform

rights transferred

Creator marketing platform · private

Two-sided workspace for creators and marketing partners: account onboarding, CPL and revenue-share campaigns, performance analytics, media workflows and balance operations.

React · TypeScript · HeroUI · Tailwind CSS · Recharts
